

Shreyas Zanzad

FULL STACK DEVELOPER

7385405615 | shreyas.zanzad12@gmail.com | [linkedin.com/in/shreyas-zanzad](https://www.linkedin.com/in/shreyas-zanzad) | github.com/Shreyaszanzad | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Full Stack Developer with strong experience in Node.js, React.js, and JavaScript (ES6+) - specializing in designing and developing scalable full-stack applications, building and consuming RESTful APIs, and integrating Generative AI and LLM capabilities into production-grade web applications. Experienced in Express.js backend development, MongoDB and PostgreSQL database management, and responsive high-performance frontend development using React.js with Redux Toolkit and React Query. Actively integrating OpenAI and Gemini APIs into full-stack products with a solid foundation in prompt engineering and AI/ML API workflows. Familiar with cloud platforms including AWS and CI/CD pipeline deployment. Strong collaborator across cross-functional teams including product, design, and data teams, with a consistent focus on performance, scalability, security, and clean maintainable code. B.Tech Computer Science graduate with 1+ year of industry experience based in Pune.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, React Query (TanStack Query), Bootstrap, Tailwind CSS, shadcn/ui, GSAP, Framer Motion, Responsive Design
Backend: Node.js, Express.js, RESTful API Design, Microservices Architecture, REST API Integration, Asynchronous Programming, Axios
AI and Generative AI: OpenAI API, Gemini API, LLM Integration, Prompt Engineering, LangChain, RAG Architecture (in development)
Databases: MongoDB, PostgreSQL, MySQL (familiar), PGVector, Prisma ORM
Cloud and DevOps: AWS (Cognito, RDS, EC2), CI/CD Pipelines, Vercel, Git, GitHub, Version Control, Docker (familiar)
Testing and Quality: Jest, Unit Testing, Code Review, Performance Optimization, Security Best Practices
Soft Skills: Cross-functional Collaboration, Technical Documentation, Agile Development, Independent Working, Written Communication

EXPERIENCE

C-DAC ACTS <i>Trainee - CCPP 2026 Program (Full Stack and AI Development)</i>	Nov 2024 – Present <i>Pune, Maharashtra</i>
- Designed and developed a scalable full-stack AI application (AI Prompt Builder Tool) using React.js, Node.js, and Express.js, integrating OpenAI and Gemini APIs for Generative AI-powered prompt generation and LLM-driven workflow automation in a 4-person cross-functional team. - Built and consumed RESTful APIs across the full application stack using Express.js and Axios, implementing asynchronous programming patterns, consistent error handling, and React Query-powered server state synchronization for high-performance, low-latency data interactions. - Structured the Node.js backend following microservices design principles with independent API, authentication, and data service modules, improving scalability, maintainability, and separation of concerns across the application architecture. - Integrated OpenAI API for intelligent prompt generation, implementing prompt engineering techniques to optimize LLM response quality, accuracy, and context management within the application workflow. - Managed complete CI/CD pipeline and deployment workflow using Git version control and Vercel, with AWS (Cognito, RDS, EC2) as target cloud infrastructure, ensuring consistent and reliable production deployment processes. - Participated in code reviews, unit testing with Jest, and performance optimization across the full stack, maintaining code quality standards and delivering a production-ready application with zero regressions.	
Microland <i>Senior Network Engineer</i>	Jun 2023 – Oct 2024 <i>Pune, Maharashtra</i>
Delivered scalable technical solutions for 10+ enterprise clients in a high-velocity environment, collaborating cross-functionally across 3 to 5 stakeholder teams simultaneously and consistently meeting SLA timelines.	

- Optimized Linux/Unix server automation workflows through advanced shell scripting, reducing manual operational overhead by 40% and demonstrating a consistent focus on performance, scalability, and security in production systems.
- Drove technical reviews across client deployments, providing constructive feedback on architecture standards and security compliance, directly building the code review and quality assurance mindset critical in full-stack engineering teams.

Webrelier Software Solution

Jan 2023 – Jun 2023
Pune, Maharashtra

Web Development Intern

- Built and deployed responsive, high-performance web applications using HTML5, CSS3, JavaScript, and Bootstrap across 5+ client projects, consuming RESTful APIs and translating design mockups into production-ready full-stack interfaces.
- Collaborated with cross-functional teams including designers and backend engineers to define requirements, debug application issues, and deliver scalable frontend solutions, reducing revision cycles by 25% through structured iterative delivery.

PROJECT EXPERIENCE

AI Prompt Builder Tool | *React.js, Node.js, Express.js, MongoDB, OpenAI API, Redux Toolkit, React Query* | [GitHub](#)2024 –

- Designed and developed a scalable full-stack application integrating Generative AI and LLM capabilities via OpenAI API, enabling intelligent prompt generation, context management, and AI-powered workflow automation through a high-performance React.js frontend and Node.js/Express.js backend.
- Built and consumed RESTful APIs with asynchronous programming patterns, MongoDB database integration, and React Query server state management, delivering a responsive and performant full-stack product optimized for scalability and maintainability.
- Implemented microservices-style backend architecture with independent Node.js service modules, CI/CD deployment via Vercel, and Jest unit testing, ensuring production-grade code quality, security, and zero-regression deployments.

Stock Price Predictor | *Python, scikit-learn, Random Forest Classifier, Pandas, NumPy* | [GitHub](#)2023

- Built and trained a machine learning model using Random Forest Classifier on historical stock market data, demonstrating hands-on AI/ML model development, data preparation, feature engineering, and model evaluation skills directly applicable to AI integration in full-stack applications.
- Implemented end-to-end ML pipeline including data cleaning with Pandas, model training with scikit-learn, and performance evaluation, reinforcing practical AI/ML foundations that underpin Generative AI integration work.

Actress Portfolio Site | *Next.js, Tailwind CSS, GSAP, Framer Motion*2024

- Designed and deployed a production-grade, fully responsive high-performance web application with complex interactive UI animations using GSAP and Framer Motion, demonstrating advanced frontend performance optimization and cross-device scalability.

EDUCATION

Vishwakarma Institute of Technology

June 2023
Pune, Maharashtra

B.Tech, Computer Science Engineering

- GPA: 8.17/10 (Distinction)

CERTIFICATIONS

Salesforce2024

Certified AI Specialist
Prompt Engineering, LLM Evaluation, Generative AI, Enterprise AI Integration

Salesforce2024

Certified AI Associate
